ELECTION ANALYSIS 2024

OBJECTIVE

The objective of this task is to analyze the 2024 election data to gain insights into the election results,

party performance, and voter trends across various constituencies. You will use Power BI or Tableau to create interactive visualizations and dashboards that will help stakeholders understand the election outcomes and the dynamics between different political alliances.

OVERVIEW

1.) Created Card Visuals:

- Average Vote Margin: Displays the average difference in votes between the leading and trailing candidates.
- Total Number of Seats: Shows the total number of seats contested.
- o Total States: Indicates the total number of states involved in the election.

2.) Added Slicers:

- State: Allows filtering data by specific states.
- Constituency: Enables filtering by individual constituencies.
- Party Alliance: Facilitates filtering by different party alliances.

3.) Added a Map Visual:

Leading Party by State: Shows the party leading in each state visually on a map.

4.) Added a Table:

- Leading Party Alliance by State: Lists the leading party alliances for each state.
- Leading Party vs Trailing Party by State: Compares the leading party with the trailing party in each state.

1.) Data Integration:

Combine the election results data with the party alliance data to get a comprehensive view of which alliances are leading or trailing in various constituencies.

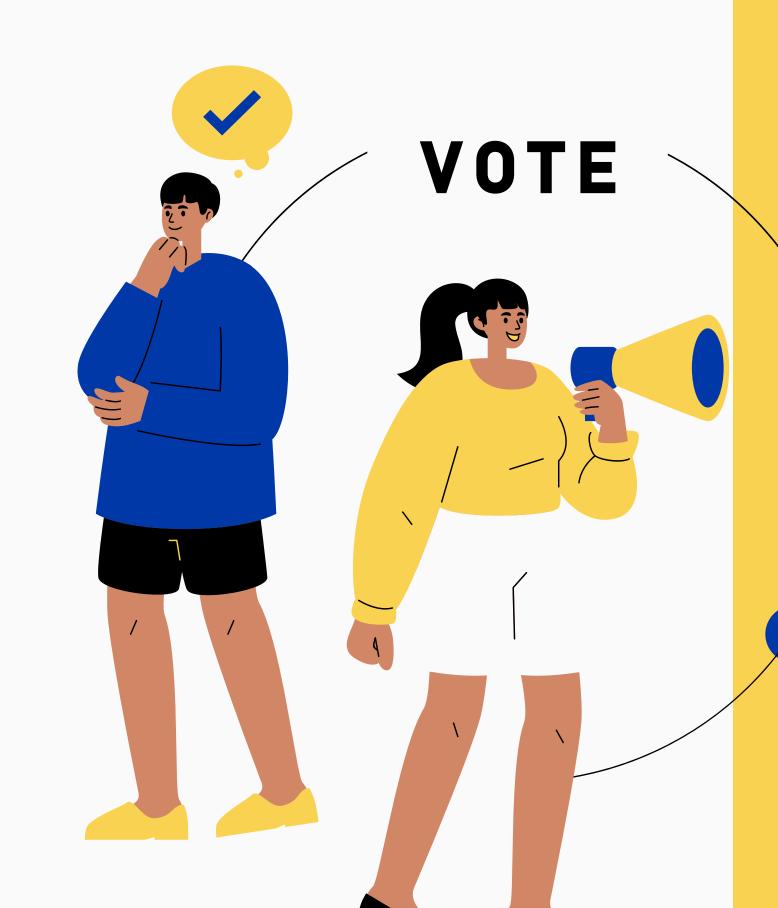

2.) Data Cleaning and Preparation:

Ensure data quality by checking for missing values, inconsistencies, and correcting any errors in the datasets.

3.) Data Analysis and Visualization:

- i.) Overall Results: Create a summary of the overall election results including the total number of seats won by each party and alliance.
- ii.) State-wise Analysis: Visualize the performance of leading parties and alliances across different states.
- iii.) Constituency-wise Analysis: Analyze and visualize the margin of victory/defeat in various constituencies.
- iv.) Party and Alliance Comparison: Compare the performance of different parties and their respective alliances in terms of seats won, margins, and status.

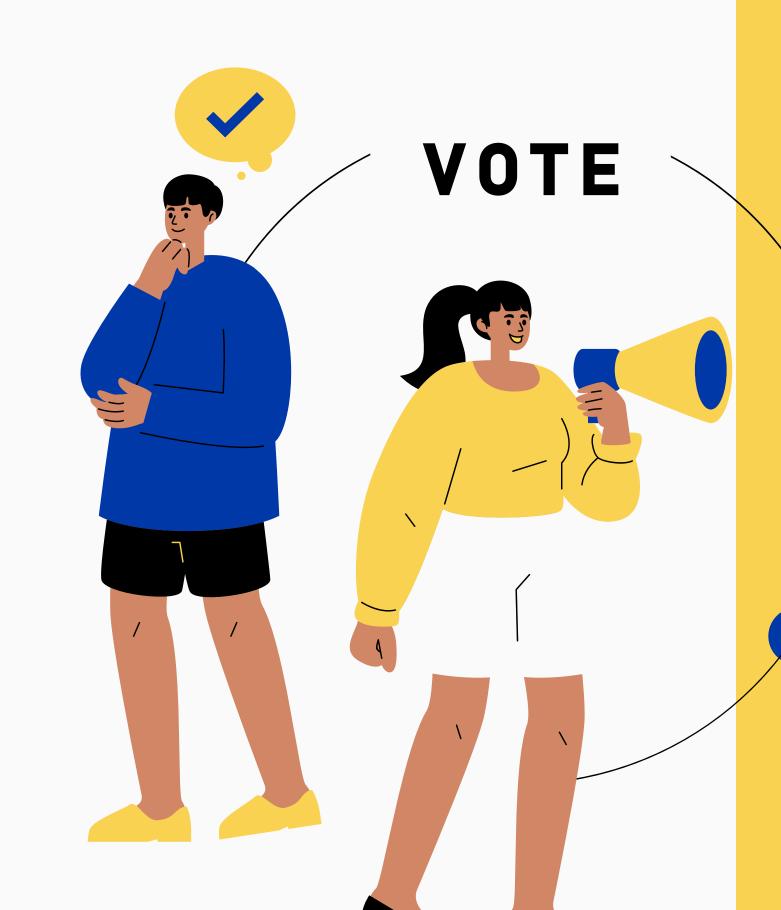

4.) Interactive Dashboard:

- i.) Trend Analysis: Identify and visualize trends in voting patterns, such as regions with high competition (small margins) or dominance by specific parties or alliances.
- ii.) Create an interactive dashboard that allows users to filter and explore the data by state, constituency, party, alliance, and status.
- iii.) Include key performance indicators (KPIs) such as total seats won, average margin, and number of constituencies won by alliance.

5.) Insights and Recommendations:

- i.) Provide a detailed report summarizing the key insights derived from your analysis.
- ii.) Offer recommendations based on the data, such as strategies for parties to improve their performance in future elections.

RECOMMENDATIONS:

- 1.) Address Critical Issues: Focus on major issues that are important to voters, such as healthcare, economy, education, and security. Present clear and actionable plans.
- 2.) Increase Voter Turnout: Implement strategies to boost voter turnout, such as better voter registration drives, offering transportation to polling stations, and encouraging early voting.
- 3.) Strengthen Ground Game: Build a robust ground campaign with more volunteers for door-to-door canvassing, phone banking, and local events to drive voter mobilization.
- 4.) Collaborate with Influencers: Partner with local influencers, community leaders, and celebrities to gain endorsements and amplify campaign messages.
- 5.) Monitor Opponent Strategies: Keep a close watch on opponents' strategies and counteract with timely and effective responses to any misinformation or negative campaigning.

THANK YOU
